

► This Issue: Closing Out The Year and Looking Ahead

Our Thanks to You!

As a small token of our appreciation for your partnership with us this past year as a client or a business partner, we have made a financial contribution to further our efforts to introduce computer technology into rural schools in Guatemala. If you haven't had an opportunity to see the impact this has had and our plans for the next two years, please take a few moments to watch a [video update](#). Thank you for being a part of changing the lives of children in Guatemala.

BI Networking Lunches

iBusiness Solutions will be hosting lunches during Q1 to connect our past clients with each other and to share whatever knowledge we can with you regarding our perspective on the BI industry and BI technologies. Lunches will be scheduled on several different days in different locations to make it as convenient as possible for all of you. Watch your email for your personal invitation or [email Tim Brands](#) to ensure you receive an invitation.

As we complete our 10th year at iBusiness Solutions, we are reminded again of the blessings of working with great clients and partner organizations. On this the final day of 2009, we look forward to working with many of you again and reconnecting with some of you with whom we have not talked recently.

You have heard the saying "out with the old and in with the new" but at iBusiness Solutions we are making a conscious effort to reconnect with "old" clients in 2010. We recently conducted a survey of our past clients, specifically our past Hyperion clients, asking about your intentions for your BI technologies as a result of vendor consolidations and current economic conditions. If you are interested in the results of this survey, [email](#) us for a summary of the findings.

Based on the results of this survey, more than half of respondents intend to upgrade to a new version of Hyperion even though Oracle's stated direction is to sunset this product line. Another 30% of respondents will evaluate alternative tools before deciding on a course of action.

iBusiness Solutions has a number of resources available to assist you with planning and executing a Hyperion upgrade, conducting a tool evaluation, and migrating from Hyperion to a new platform. Whether upgrading or migrating away from Hyperion, no one knows Hyperion like iBusiness Solutions and that knowledge and hard-earned experience can be crucial to your success.

Also, if you are evaluating other technologies, we have consultants experienced with products ranging from Microsoft and OBIEE to Business Objects, Information Builders, and others as well as a network of expert resources we can tap into for your benefit.

All of us at iBusiness Solutions wish you a happy, healthy, and prosperous new year, and we look forward to reconnecting and staying in touch with all of you in 2010 as we begin our second decade of "transforming data into actionable information to help our client organizations and their people achieve business goals."

Sincerely,

Timothy Brands, President
