

**First Quarter Webinar Schedule Announced**

iBusiness Solutions is pleased to announce the scheduling of the webinar **"Bringing Location Intelligence to Hyperion Dashboards"**, scheduled for 11:00 am CST on Tuesday, March 6th, 2007. This webinar is one more demonstration of our leadership in delivering Performance Management applications using the Hyperion Solutions product line. Attendees will learn the following:

- An introduction to Location intelligence, and how it fits into Hyperion Performance Management applications;
- How to quickly add Location Intelligence to existing Hyperion Interactive Reporting dashboard applications;
- Examples of client applications, prototypes, etc.

[Register](#) today for "Bringing Location Intelligence to Hyperion Dashboards"!

Also scheduled this quarter is the webinar **"Hyperion System 9 BI+ Dashboard Options"**, scheduled for Thursday March 15th at 11:00 am CST. This webinar will help clients understand more about the dashboard development and delivery options available to them with the Hyperion System 9 BI+ product suite. System 9 BI+ is leaving clients uncertain which tool to use when delivering Performance Management dashboards, and during this webinar you will learn about dashboard development options, hear pro's and con's of each tool based on our engagement experiences, and see application examples developed in Web Analysis and Interactive Reporting.

Newsletter Spotlight

Are you consulting material? Looking for another job? We are in the process of adding consultants as well as expanding our portfolio of independent consultants to be used on an as-needed basis. If you are interested and would like more details, please email [Tim Brands](mailto:Tim.Brands@ibusiness.com).

**Solutions 2007: Three "Must-See" Client Presentations**

If you're attending the annual Hyperion Solutions global conference in April here are three presentations we recommend you attend:

- 1. Developing Supply-Chain and Executive Dashboards at Motorola Inc.** (Session Code: 3127)
- 2. McKesson Medication Management Demonstrates Customer Value with a Dashboard that Pushes the Limits of Web Analysis** (Session Code: 2032)
- 3. Personnel Recruiting Dashboard: A Visual Paradigm** (Session Code: 2149)

We're proud to have been involved with the success of these unique applications. Together they highlight the range of Performance Management applications organizations are delivering today, as well as the key technical qualities these applications demand:

- Integration of multiple data sources, including Hyperion Essbase;
- A component-based assembly environment that can be extended with client-specific applications, and
- Integration of key visualization tools and techniques, like GIS maps, help screens, and notation capabilities.

Whether you are trying to improve your financial reporting or create new Performance Management applications like those above, [email us](#) or give us a call at 612-730-7404 to discuss your solution options.

Also, check our [website](#) in the coming weeks for advanced copies of these presentations prior to the Solutions 2007 conference. Check out the [Solutions 2007 website](#) for more details and registration information.
